(a) Synthetic part 21,720 samples

Read speech; speakers only from the official test splits of AISHELL-1/2/3, KeSpeech and MagicData

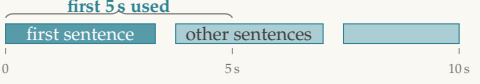

(b) Real part 2,381 samples

AliMeeting and AISHELL-4 far-field meetings, MagicData-RAMC phone calls, web conversations; recordings used without mixing

(c) Enrollment

10 s of one speaker are stored per enrollment: the first sentence, then other sentences of this speaker that do not occur in the mixture, with 0.3–0.6 s pauses. Shorter enrollments are zero-padded; 2, 3 and 4 s enrollments are evaluated separately on the same scenes.
